

## NOVEMBER 2017 UPDATE

November was a very lively month at the XWA construction site. The excavation of the terminal basement footings, installation of the required rebar and the placement of concrete all took place. There will be work through the winter months forming footings and foundation walls. We are anticipating placing the first “flatwork” deck pour in Spring of 2018.

Several Design firms have been selected through the Request for Qualification process (RFQ), a qualification based selection method to complete the essential design associated with the construction projects for XWA.

- Authorization to Bid:
  - Design, Bid and CA/CO Consulting Services for Airfield Electrical Vault (XWA)
- Bid Openings/Awards:
  - XWA Design, Topographic Survey, Geotechnical Bidding, CA/CO Consulting Services for County Road 7 Improvements (Alliance Consulting)
  - XWA Design, Bid, CA/CO Services for Fueling Operations (KLJ)
  - XWA Design, Bid, CA/CO Services for Perimeter Road, Apron Access Road and Fence (Burns McDonnell/Alliance Consulting)
  - XWA Design, Bid, CA/CO Services for Runway 4-22, GA Apron and Associated Taxiways and Taxi lanes (Burns McDonnell/Alliance Consulting)

The runway projects are underway as well and will also be worked on through the winter months.

All in all, a very productive month on site!
