

## June 2018 Update

June is proving to be another productive month at XWA. The runway and taxiway projects are tracking right on schedule with activities that included;

- ✓ Subgrade Preparation
- ✓ Geotextile Fabric
- ✓ Specified Aggregate Installation
- ✓ Edge Drain
- ✓ Blue Topping
- ✓ Electrical Runs
- ✓ Paving Machine Maintenance
- ✓ Batch Plant Erection

The security division has added a second guard shack as it relates to the site safety and security scope. Looking ahead to July, the staging of materials for the onsite water and waste water utility projects have started and on-site work will begin. And, the test running of all equipment and paving on the runway is anticipated to start as well.
